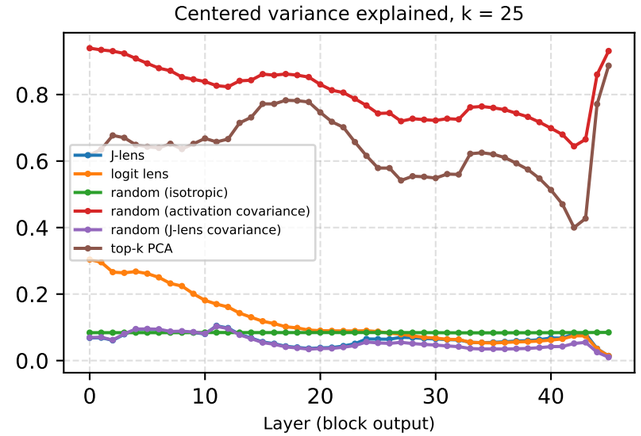
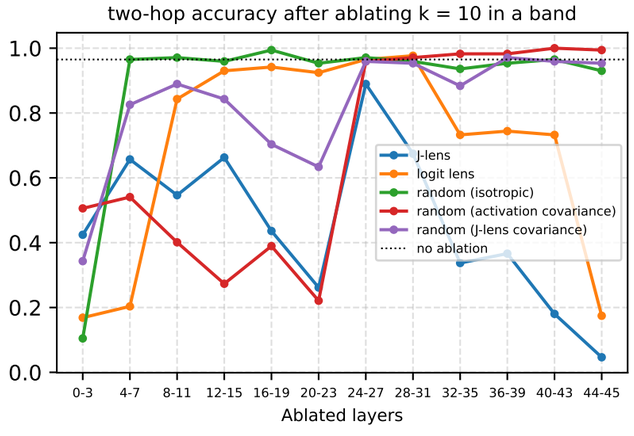
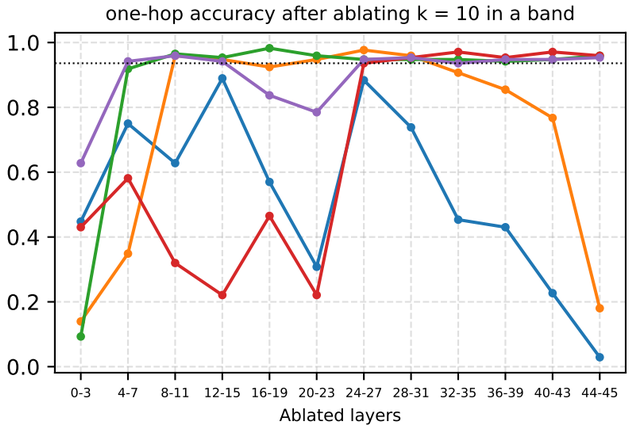
gemma-2-27b



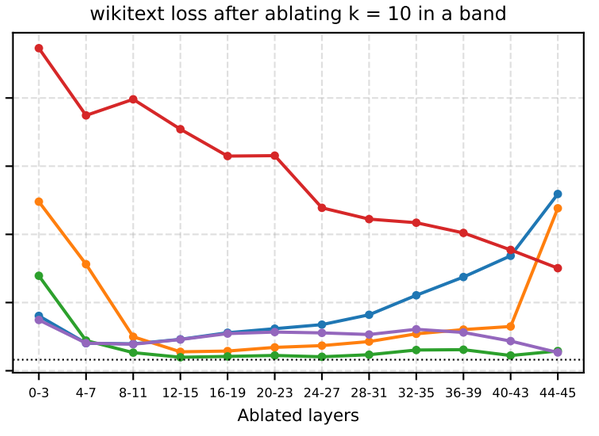
Centered variance explained, k = 25
J-lens
logit lens
random (isotropic)
random (activation covariance)
random (J-lens covariance)
top-k PCA
Layer (block output)



two-hop accuracy after ablating k = 10 in a band
J-lens
logit lens
random (isotropic)
random (activation covariance)
random (J-lens covariance)
no ablation
Ablated layers



one-hop accuracy after ablating k = 10 in a band
Ablated layers



wikitext loss after ablating k = 10 in a band
