Activations alone
depth 0.25 of the blocks
depth 0.5 of the blocks
depth 0.625 of the blocks
depth 0.75 of the blocks
Qwen3
OLMo-3
Llama-3.1
J-lens occupancy, median over positions
Width d
Gaussian with the activations' covariance (no words)
one dimension carries >= 20% of the variance: no baseline
J-lens occupancy, median over positions
Width d
Planted words in isotropic noise, s = 0.1, k from 50 to 400
measured = predicted
J-lens occupancy, median over trials
Predicted s d / ((1 - s) 2 ln N)
